Alumni Profile

TEXTILE TECHNOLOGY 1999-2003

M.R. Sudha Rani
Technical Officer
Govt. of India,
Ministry of Textiles.

Who or what was the biggest influence on your career?

My biggest influence for my career are my parents. First of all, they never gave restrictions regarding my career and also madam Ms. Devatha, HOD, Textile Department, PABCET. She only made me to apply for this post and encouraged just like anything for attending the interview at Delhi and obviously my parents who took me to Delhi for attending the interview and also to Mumbai as my first posting was at Head Office, Mumbai. Ever I will be thankful for my parents and madam Ms. Devatha throughout my life time...

What's the best advice you didn't take?

"Don't believe everyone at the first instance itself."

What kinds of life or personal experience, paid or unpaid, would you encourage for someone pursuing a career in this field?

"Hard work without give up in textile field minimum for a period of continuous 5 years will definitely pay you fruits."

What advice do you have for recent Graduates of PABCET?

"Don't ever misunderstand about the branch (i.e., may be textile, computer, electronics etc.,) you have chosen. World is very wide as you learn only a part of it in your college life. Keep on learning even after your college campus as that only will provide you sufficient knowledge and power to go on throughout your career."

INFORMATION TECHNOLOGY 1998-2002

Ramkumar
Manager Operations,
Axa Technologies
Shared Services

Who or what was the biggest influence on your career?

Not one in particular, lot of people have influenced me in shaping my career, I have taken a leaf each from many's books to become a better IT Professional.

What's the best advice you didn't take?

"Boss is always right"

What kinds of life or personal experience, paid or unpaid, would you encourage for someone pursuing a career in this field?

My Experience in this field has been amazing so far, lot of ups and downs, successes and failures, encouragements and discouragements. One should be mentally very strong to overcome all of this to be successful.

What advice do you have for recent Graduates of PABCET?

The life actually starts only after the graduation. Soft skills play a major part in getting through an interview. In my opinion the first two years of career will decide the growth and career progression one would have in future. It is extremely important to give the very best during this period.

Mr. Suganth: AP/TT(PABCET)

"My College PABCET provided me with a solid, affordable foundation for an advanced degree. As a student here, I always gave it my best - and I believe they gave me their best. The excellent classroom instruction sparked an interest in Textile Field. I am proud to work in my college."

Mr. Vijayanandhan: AP/EEE (PABIIT)

"My education at PABCET has been an integral part of the success in my life, career, and post graduate education. It would be very easy for faculty at any college to give their students the right answers, but my Managing trustee only pointed me in the right direction so that my skills could be developed. Through their presentation of challenging situations and developing my analytical skills, I have become a more valuable employee as well as better person."

Up To The Edge And Over

First line about my friend Rajesh, the very full and busy life he led. The reason I call this piece up to the edge and over is because that is how he lived his life, with unbreakable thrill seeking attitude. This was his approach to most "obstacles" he faced in his life. There are many fun stories about Rajesh I wish to share eventually but for now i share this with others who didn't know him, he is one of the indomitable spirit who is an all rounder, fastest man of Anna university-Zone 8, an efficient Volleyball Captain who played basket ball too, rided motorcycle as a professional racer,a good dancer,a naughty student, an interesting junior, a friendly senior, what not he was(studies)!!!!

Miss You Rajesh!

I wish he will give a bright smile if he read this now!!!

The friendships I built over the course of my college career form many of my friendships now. I have friends sprinkled throughout tons of businesses and organizations and walks of life now. A relationship I built with my academic advisor got me my first real college job. A relationship I built with an awesome staff member got me a research job related to my area of study. A relationship built with a professor helped me to get my first post-college job.
